

Job Description: UX/UI Designer

A UX/UI designer is responsible for creating interactive programs that enhance a customer's experience with a brand and facilitate an enjoyable experience on the business's website.

UI/UX Designer responsibilities include:

- Gather and evaluate user requirements in collaboration with project managers and developers
- Illustrate design ideas using storyboards, process flows and sitemaps
- Design graphic user interface elements, like menus, tabs and widgets
- Build page navigation buttons and search fields
- Develop UI mockups and prototypes that clearly illustrate how sites function and look like
- Create original graphic designs (e.g. images, sketches and tables)
- Prepare and present rough drafts to internal teams
- Identify and troubleshoot UX problems (e.g. responsiveness)
- Conduct layout adjustments based on user feedback
- Adhere to style standards on fonts, colors and images

Qualifications required

We are not requiring work experience but a portfolio of work to show is mandatory. This can be obtained through internships, university or holiday work. We also expect a good knowledge of:

- wireframe tools (e.g. Wireframe.cc and InVision)
- Up-to-date knowledge of design software like Adobe Illustrator and Photoshop
- Team spirit; strong communication skills to collaborate with various stakeholders
- Good time-management skills
- BSc in Design, Computer Science or relevant field
